

# We're Growing Trees

3,000 Pine Tree Seedlings

God's Promise Publication

We are partnering with Tree Planters across the U.S.A.

In February, 2023, We Received 3,000 Seedlings of a Pine Tree from a local business.

After Two Weeks of Heavy Rain in January, 2023, we saw Super Blooms of various species of native plants.

Tree Seedlings were one of them.

We found thousands of seedlings that we had never seen before.

We are raising the seedlings till they're big enough to sell or replant. Mature pine trees will give shade, strong roots, strong foundations for homes and cities, Pine trees can also clean our air by absorbing CO2.

Planting A Tree Makes A Difference.
